### DETAILED ACTION

#### Response to Arguments

 Applicant's arguments, see page 9 paragraph 2, filed 3/05/2004, with respect to claims 10, 13-16, 26 have been fully considered and are persuasive.
 The rejection of claims 10, 13-16, 26 has been withdrawn.

# Allowable Subject Matter

- Claims 10, 13-16, 26 are allowed.
- The following is an examiner's statement of reasons for allowance:

The applicant's arguments with respect to the maintaining gaseous coolant in the coolant chamber and expelling the gaseous coolant through a plurality of slots in the face of the chuck are not suggested by the prior art. The closest prior art of Helms et al. (US 4.869,801) does not have the plurality of slots on the face of the chuck through which gaseous coolant is expelled. Additionally, Helms et al. makes no provision to maintain gaseous coolant in the coolant chamber received from the hollow shaft during the plasma etching.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

# Examiner's Amendment

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filled as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas D'Amico's assistant, Megan Sunkel on 5/25/2004.

The application has been amended as follows:

In the abstract page 23:

Before the first line, add "A method utilizing".

In line 1, change "A" to lower case.

In line 1, after "machine", add "which".

In line 25, delete all words following "clamp the wafer." .

In the abstract page 24:

Delete all text.
